

NuView Systems Named to Software 500

Software Magazine Ranks NuView Systems as one of the World's Largest Software Companies

[October 20, 2009] NuView Systems today announced its inclusion on *Software Magazine's* Software 500 ranking of the world's largest software and service providers, now in its 27th year. NuView ranked #417, significantly moving up the chart from the previous year (#474), as a result of its global expansion and growing market popularity.

"The 2009 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of \$491.3 billion worldwide for 2008, representing 8.8% growth from the previous year," says John P. Desmond, editor of *Software Magazine* and *Softwaremag.com*. "The Software 500 helps CIOs, senior IT managers and IT staff research and create a short list of business partners," Desmond says. "It is a quick reference of vendor viability."

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers, targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing. Some 44 percent of the 2009 Software 500 companies were privately held.

The ranking is based on total worldwide software and services revenue for 2008. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware.

The financial information was gathered by a survey prepared by King Content Co. and posted at www.Softwaremag.com, as well as from public documents.
