

Leading Energy Technologies Company Powers Up with NuViewHR®

NuView Systems announces that American Superconductor, a leading energy technologies company, has chosen NuViewHR® to support its explosive growth as the world economy seeks new energy sources and power efficiencies.

American Superconductor (AMSC) offers an array of solutions based on two proprietary technologies: programmable power electronic converters and high temperature superconductor (HTS) wires. The company's products, services and system-level solutions enable cleaner, more efficient and more reliable generation, delivery and use of electric power.

As the world's principal supplier of HTS wire, AMSC enables a new generation of compact, high-power electrical products, including power cables, grid-level surge protectors, Secure Super Grids(TM) technology, motors, generators, and advanced transportation and defense systems. AMSC also provides utility and industrial customers worldwide with voltage regulation systems that dramatically enhance power grid capacity, reliability and security, as well as industrial productivity.

The demand for clean and renewable sources of electricity, such as wind energy, and the demand for modernized power grid infrastructure, is being driven globally by a variety of factors. These include increasing electricity usage, power grid capacity constraints, fossil fuel price volatility, and harmful levels of pollution and greenhouse gases. In addition, the growing digital-based economy demands better power reliability and quality.

American Superconductor works with leading global utilities, companies and agencies such as Consolidated Edison, Electricite de France, Long Island Power Authority, Northrop Grumman, Siemens, Southern California Edison, Suzuki Shokan Co., Tennessee Valley Authority, U.S. Navy, U.S. Department of Energy and the U.S. Department of Homeland Security, among others.

Recently, AMSC announced major contracts with Beijing-based Sinovel Wind Corporation Limited, Ghodawat Industries (India) and AAER, Inc., Canada's first wind turbine manufacturer.

Founded in 1987, American Superconductor is headquartered in Devens, Massachusetts and has 500 global employees. AMSC will begin implementing NuView's *HR & Benefit Administration, Employee Self-Service, Manager Self-Service, Recruiting Management and Candidate Self-Service* modules to start.
