

NUVIEWHR PAYROLL (IN-HOUSE)

Our *in-house Payroll* module offers solutions to complex payroll needs, while providing the flexibility and control required by today's businesses.

Process payrolls on your schedule – not some predetermined vendor schedule – and audit payroll data and correct errors before checks are printed.

Print manual checks on demand, and process expense reimbursements, whenever needed. Void checks and related transactions easily.

Payroll is capable of allowing you to file your own taxes (and save money) or to interface with a tax filing service.

All of the data is within easy reach, including unlimited check history on-line and access to the prior year's pays, taxes and deductions. Process your current year payroll before the prior year is finished.

You can even export data in Excel format for additional analysis and reporting.

Payroll is fully integrated with HR, which means changes easily flow from one to another, in real-time, without duplicate entry.

Add a new employee on the HR side, and the employee and related information is automatically passed to the payroll side.

The Payroll module interfaces with General Ledger Systems and 3rd party time keeping for advanced labor tracking and job costing.

Payroll offers capabilities to define your own screens and maintain all of the data unique to your organization, plus a powerful report writer to access and report on your data.

HIGHLIGHTS

- ✓ Process payrolls on your schedule
- ✓ Effective dating allows for point-in-time reporting and views
- ✓ Formula driven solution to handle even the toughest payroll rules
- ✓ Process current year payrolls before prior year is completed
