

REPORTING

Information is a critical part of our Human Resource Information System because it allows you to make strategic decisions and take necessary actions.

Companies may also maintain unique data fields and tables, and import outside data such as salary survey and metric benchmarking data, for better decision making.

Users can access current and historical information quickly, and easily, without having to know SQL coding or attend formal Crystal training classes. NuViewHR performs automatic table joins behind the scenes.

NuViewHR allows any type of user – from novice to advanced technical user, to access and run reports on demand, and include any data within the system.

We start by including over 150 standard reports out of the box, which include all of the compliance reports (EEO, VETS, OSHA), and many other useful reports developed over the years for our diverse client base.

These reports can be copied and modified by users to meet their exact needs.

Users can also create their own ad hoc reports using the Report Writer. All data fields, including unique fields, can be included in your reports.

We make it so easy that users may select fields right from the displayed form – so they see the field “in context”, ensuring the desired field is included.

NuViewHR also makes it easy to develop queries (or filters) against the data so that only the desired subset of information is reported.

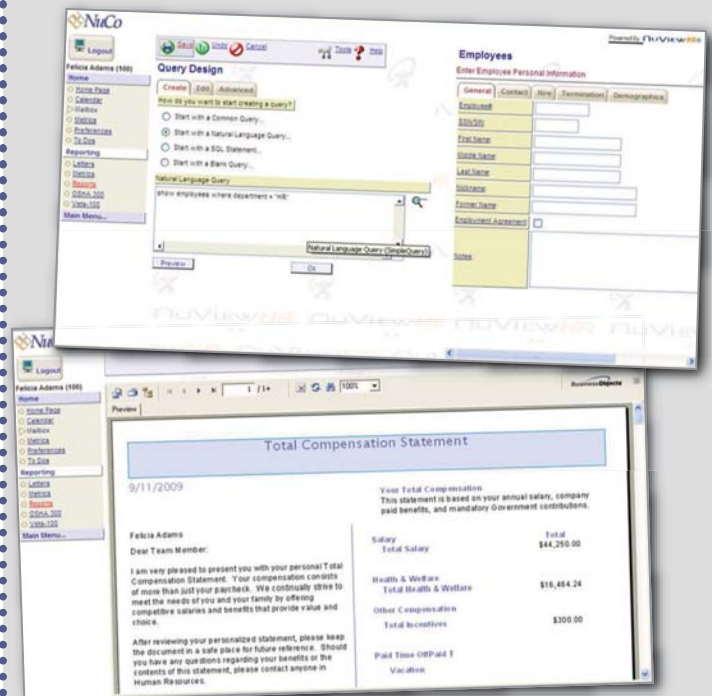

Query options include:

- Drop down standard queries
- Native language queries
- Advanced SQL statements

All query and report data can be easily exported to popular programs such as Word, Excel and others for additional analysis.

HIGHLIGHTS

- ✓ Over 150 standard reports out of the box
- ✓ Compliance reports
- ✓ Copy and modify or create new reports
- ✓ Queries by drop downs, native-language statements or SQL
- ✓ Point-in-time reporting; unlimited history
- ✓ Security extends to reports and exports
- ✓ Select fields “in context” from displayed form
- ✓ Support for Crystal 2008
- ✓ Schedule and email NuViewHR queries/reports
